

GLOBAL SOFTWARE, INC. LAUNCHES ADVANCED EXECUTIVE DASH™ WITH HOSTED QUERYEXCHANGE™ AND FREE EVALUATION EDITION

RALEIGH, NC (February 8, 2010)- Global Software, Inc., the No. 1 provider of Microsoft® Excel-based automation and analysis tools to the leading enterprise resource planning (ERP) platforms, launches a new advanced version of Executive DASH™ with a hosted QueryExchange™ and free Evaluation version of the solution.

Executive DASH™ is a Microsoft® Excel-based solution enabling users to build a range of reports from intuitive ad hoc workbooks to complex dashboard-type views of critical business data. This Excel add-in seamlessly retrieves information on the network and returns the data dynamically from multiple sources into a spreadsheet. The latest advancement of Executive DASH is the hosted QueryExchange, an online depository of queries from which the user may download selected queries to the users Excel environment and immediately utilize them in Excel.

Global Software's Executive DASH Evaluation edition is a free version ideal for learning, exploring, and developing reports within Excel. Solutions developed with the Evaluation edition can be upgraded to enhanced versions of Executive DASH, including Executive DASH Standard or Executive DASH Professional, which can be purchased under Global Software's Perpetual License Fee Program (PLFP). Both the Standard and Professional editions unlock powerful features and capabilities. Executive DASH Evaluation is available for download at <http://www.globsoft.com/EdashOverview.aspx>.

"In continuing with the traditions of our company in meeting the market demand and valued customer needs, Global Software has yet again proven to be on the leading edge of innovation and the worldwide leader in the spreadsheet automation space with our delivery of V12R4 of Executive DASH. The development and continued enhancement of this established tool, including the hosted QueryExchange, bring an organization's entire operational life dynamically into Excel," states Spencer Kupferman, vice president, corporate affairs.

Global's hosted QueryExchange enables users to share queries amongst each other. As the users build queries they are published to a structured online environment and then evaluated, commented and tagged online. The QueryExchange provides a starting point to create queries against critical business data. A user can search online and immediately find, download and execute the queries within the Exchange. This accelerates the building of financial and business reports without redesigning the individual queries, speeding up the reporting processes and increasing the spreadsheets integrity.
